

## SHEPARD IS BOLDER.

Intimates Now that an Independent Ticket Is Almost a Certainty.

### DEFINITE NEWS ON MONDAY.

An Announcement May Then Be Made of the Anti-Machine Men's Plans.

### FIGURED CLOSELY ON TIME.

Is to Confer with Charles S. Fairchild on the Subject Again To-Day.

From all indications to-day it looks as if the independent and anti-machine Democrats really intended to cut loose and place a complete independent Democratic ticket in the field. This supposition is based on a conversation with Edward M. Shepard, who had with an "Evening World" reporter this morning.

Mr. Shepard got down to his office, 111 Broadway, half an hour early than usual. He was evidently, from his manner, anticipating a meeting of the Anti-Machine leaders. Asked whether the conference already held had been productive of definite results, he said:

"The matter of placing independent candidates in the field is now under serious consideration. I cannot say to-day whether or not this will be done. It is a little too soon to make any definite statements. However, I shall meet Mr. Fairchild to-day, and there is little doubt that a definite announcement of our intentions will be made on Monday."

In reply to the question whether their time is not too limited to permit of the preparation of a State ticket, Mr. Shepard said:

"No, we have until Oct. 12 to file our candidates' names, and I am sure that Mr. Shepard's manner, as much as his words, conveyed the impression that an independent ticket will without doubt loom upon the political horizon within the next few days."

### TWISTED THE TIGER'S TAIL.

Independents Appointed a Committee to Confer with the L.X.Y.

The Convention of the Independent County Organization last evening at Cooper Union must have been a surprise, and an unpleasant one, too, to Tammany politicians.

Not only among the delegates, but in the big crowd that cheered the platform denouncing Tammany Hall and its methods, were many faces which in former times were conspicuous at Tammany gatherings, showing that the Independent Counties have been drawing away from the forces of the Wigwag, especially in the downtown districts.

It was apparent that while the Committee of Seventy and the Good Government Clubs represent a class of voters who have always been arrayed against Tammany Hall, and therefore, represent a new element to draw away from the strength of that organization, the Independent Counties were largely made up of former supporters of Tammany, and that each one would count in the fight against the Tammany ticket for Governor.

This was especially true of the districts below Fourteenth street, where the Independent Counties have been drawing away from the forces of the Wigwag, especially in the downtown districts.

The vote last Fall showed this. The Independent Counties have been drawing away from the forces of the Wigwag, especially in the downtown districts.

The Independent Counties have been drawing away from the forces of the Wigwag, especially in the downtown districts.

## CYCLONE WENT BY.

Though It Is Now Howling Almost at the City's Gates.

Dunn Says Mariners Were Wise to Heed His Warning.

Disasters at Sea Reported by Incoming Vessels.

Residents of this city and vicinity have escaped the cyclone which has been predicted by Louis Webster, Forecaster Dunn for the last three days. It is howling and tearing at the gates of the city at the rate of fifty miles an hour, but, thanks to a high pressure atmosphere, which has come down from Nova Scotia and through the Gulf of Mexico, it has not yet reached between us and the storm, New York will not suffer.

"People here will never believe that I am right," said Mr. Dunn somewhat testily this morning, "until their backyards are torn from their moorings and thrown bodily across the roofs."

"The chief Chinese meteorologist told me once that he had predicted a typhoon and warned vessels. People in the cities waited in trembling for the typhoon to burst them into kingdom come, but it did not materialize, and then they clamored for the meteorologist's head, and he had to go into hiding for some time. His warning had, however, saved many lives and millions of dollars worth of property at sea."

"So it is with my prediction. I warned shippers. They hesitated, and I believe they will sooner or later acknowledge that my warning has saved many lives and much property."

The big cyclone is still central some distance at sea off the coast near Haiti. Its circumference reaches from the southern point of Florida to Maine. The center is following the course of the Gulf stream, and is slowly but surely working its way Northeast. It has not lost much of its fury, and will presumably keep on howling for another week or ten days.

All along the New England and Middle Atlantic coasts the gale is blowing at a terrific rate, wherever the cyclone's outer finger touches the land.

A gale of this magnitude, the temperature here was 61 degrees, and Mr. Dunn says there will be no cessation of this fair weather for the next twenty-four hours, at least.

The warmest place in the country is Galveston, Tex., 74 degrees. The coldest is Havre, Mon., where the thermometer registered 25 degrees at 8 o'clock today. Vessels that left Philadelphia yesterday, got no further than the Delaware capes when they were compelled to put back, like the South-bound ships from New York, which got as far as Sandy Hook, and then hurried back to shelter.

**DISASTERS AT SEA.**

**Incoming Vessels Report Other Craft Ashore and Heavy Weather.**

Vessels of all kinds arriving at this port bring news of disaster from the storm at sea.

The German bark Cuba arrived to-day, after an unusually long run of fifty-four days from Hamburg. She took a northern passage and experienced a succession of strong westerly gales. A hurricane burst upon her Sept. 8, when in latitude 47° 20' longitude 11°. It came out of the east-northeast, gradually shifting to the north and north-west, and blew with a fresh force for four hours. Almost an entire crew of 15 men were blown overboard, and the vessel was seriously damaged.

The ship (Brazil), twenty-five days from Rio de Janeiro, reports that on Sept. 25, in latitude 36° 20' longitude 27° 30', sighted a derelict craft three miles distant, which was a small, heavily laden, very dangerous to navigation.

## "ALMOST A MIRACLE."

A Well-Known Railroad Man's Experience.

Life Saved in a Way Which Is Wonderful, and Ought to Be Told Everywhere Far and Wide.

MR. CHARLES ANNABLE.

There is no better known railroad man than Mr. Charles Annable, who resides at 20 Jordan ave., Brunswick, Me. He has occupied positions for thirty years on the Maine Central Railroad.

"Yes," said Mr. Annable to the writer, "I can tell some remarkable stories from my long thirty years' railroad experience, but something has happened recently which is of the greatest importance to the people. Before I speak of myself, however, let me relate her wonderful experience."

"I have been troubled," began Mr. Annable, "so bad with neuralgia that I could not turn my head in bed. It seemed as though my head was paralyzed. I was so troubled with heart disease and palpitation that a good many nights I thought I might pass away during the night."

"I suffered severely, and expected every day would be my last. My head seemed so heavy as though it were paralyzed, and the least exertion would upset me and render me terribly weak and nervous. I took Dr. Greene's Nervura blood and nerve remedy, and it completely cured me—made me well and strong again."

"It seems as though my cure was almost a miracle, for I am now cured. My neighbors, who had heard of my trouble, were surprised at my recovery, and I cannot help highly express my gratitude for this wonderful medicine."

Dr. Greene's Nervura blood and nerve remedy, which has cured so many cases of neuralgia, heart disease, and other ailments, is a truly wonderful medicine. It is sold in bottles of 50 cents and \$1.00 each.

Pietro Fannassi and Charles Sullivan, charged with fraudulent naturalization, were each held in \$2,500 bail for the United States grand jury this morning by United States Commissioner Alexander.

**THREE WRECKED, THREE MEN KILLED.**  
AUGUSTA, N. Y., Sept. 28.—A bad freight wreck occurred on the Western New York and Pennsylvania Railroad, just south of East Aurora, last night. As the first section of train No. 141 was coming down the grade at Elmira Park, an oil exploded wrecking twenty-two cars of coal, and scattering the wreckage over a large area. The train was stopped by the explosion, and the engine and several cars were overturned. Three men were killed and several others injured.
